

## Preface

The enhancement enables to link multiple sites to a single badge. This is achieved by using two grids: an upper grid for the badges and a lower grid for the sites.

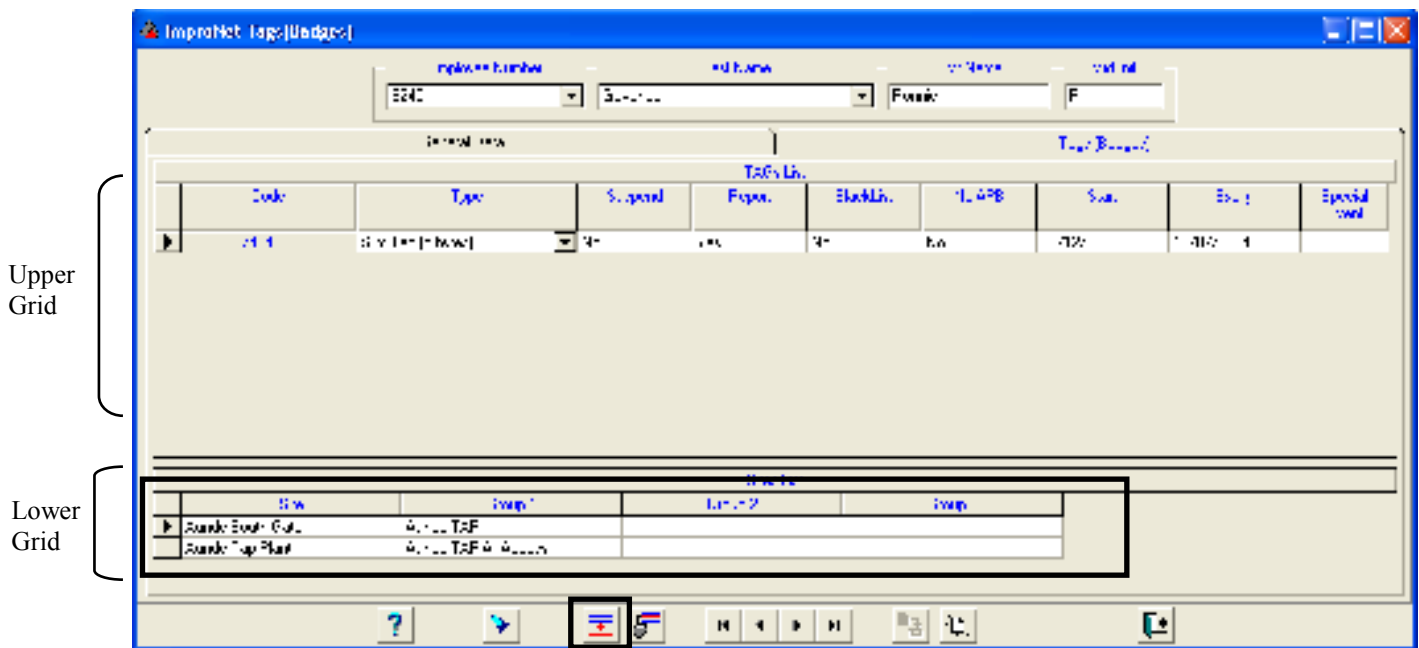

**Environment:** TKSQL

## Required program files:

DIMCARDSSQL.dll March 20<sup>th</sup> 2006 (or later)

**Installation:** Copy the program to the SQL directory and run program registration.

## Explanation on the ImproNet Tags Screen:

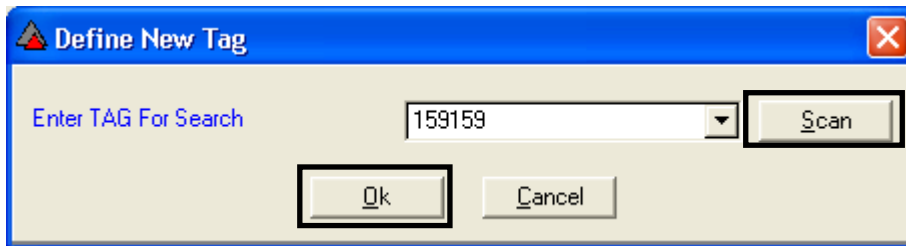

In order to add multiple sites for a certain badge, please do the following:

1. Choose the required employee number.

Employee Number	Last Name	First Name	Mid Init
1658956	Ferreira	Ricky	M

2. Create a new badge by clicking the "Add Line" button .

Define New Tag

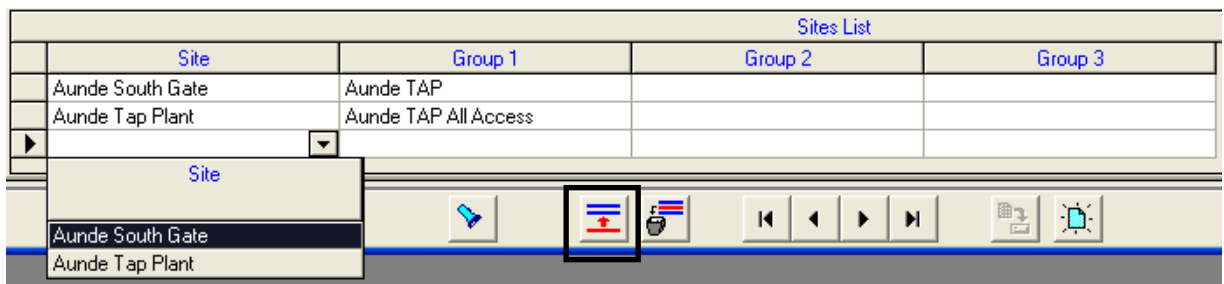

Enter TAG For Search: 159159

Buttons: Ok, Cancel, Scan

3. Input the requested badge number and click OK, or scan for a new badge if needed by clicking on the Scan button .
4. Define all the badge details: Type, Start, Expiry etc.

TAGs List									
	Code	Type	Suspend	Report	BlackList	No APB	Start	Expiry	Special Event
▶	208039074048	Slim Tag (5 bytes)	No	Yes	No	No	29/12/2003	10/07/2024	0

5. Click on the bottom side of the screen – the lower grid, and click on the "Add Line" button ; a new line will be added to the lower grid.

Sites List

Site	Group 1	Group 2	Group 3
Aunde South Gate	Aunde TAP		
Aunde Tap Plant	Aunde TAP All Access		

Bottom toolbar: Add Line button (highlighted), Print, Back, Forward, etc.

6. Choose the site, and the relevant groups.

7. Click the Save button to finish .
