

As of TKSQL April version, a new parameter was added for displaying TSM scheduler alert message When saving an employee:

In order to enable\disable the displaying this message, simply enter the Employee Screen Configuration Screen and click on the 'Additional Restriction" button:

A new parameter was added as shown below:

Note: This parameter is checked by default, by disabling this option, the alert message will not be displayed even if a Schedule is defined in the Configuration File and not configured under the Employee Screen.
