

Purpose:

When the payroll transfer is TCDAY-Based, customers require a totals-report that provides "only" the employee totals (i.e. regardless of the actual jobs reported) as a control-tool to ensure that the hours exported indeed match payroll.

Report Layout:

TC Summary Report For (05/09/2005-11/09/2005)		Page No. 1
		Production Date... 09/09/2005
		Production Time... 02:25
Plant 1 LTT	Site 1 HQ	Department 5 Painting
1006 BURNS DAVE		
PAID HOURS	PAID PREMIUMS	UNPAID HOURS
REG HRS 40.00	Eve Prem 5.00	Unpaid O/T 1.00
O/T 150% 8.00	Night Prem	
O/T 200% 4.00	8-Hour Prem	
TOTAL PAID 40.00	TOTAL PREM 8.00	TOTAL UNPAID
Plant 1 LTT	Site 1 HQ	Department 5 Painting
1006 BURNS DAVE		
PAID HOURS	PAID PREMIUMS	UNPAID HOURS
REG HRS 40.00	Eve Prem 5.00	Unpaid O/T 1.00
O/T 150% 8.00	Night Prem	
O/T 200% 4.00	8-Hour Prem	
TOTAL PAID 40.00	TOTAL PREM 8.00	TOTAL UNPAID

The employee date is displayed in three sections. Each Section (column) is entirely used-definable i.e. you may set the column name and the actual categories according to the customer requirement. The data is retrieved from TCDAY.

Environment:

TK-SQL Only

Required Program Files:

Programs		
RTCSUMSQL.DII	June-9 th 2005 (or later)	
Files to be converted from TK2000		
IMAGE IMAGE	June-9 th 2005 (or later)	Requires conversion to TK-SQL. Both for existing customers & new customers.
MES40	June-9 th 2005 (or later)	Requires conversion to TK-SQL. Both for existing TK-SQL customers & new customers.
MES80	June-9 th 2005 (or later)	Requires conversion to TK-SQL. Both for existing TK-SQL customers & new customers.

SELECT	June-9 th 2005 (or later)	Requires conversion to TK-SQL. Both for existing TK-SQL customers & new customers.
Upgrade Tables (existing TK customers & New customers)		
PARAM Table		Requires upgrade via script UPD_PARAM_RTCSUMSQL.SQL
SELECT Table		Requires upgrade via script "LP_RepRtcsumSelectSecure.sql"

Installation:

1. Copy the RTCSUMSQL.DII program to the TK-SQL directory
2. Convert IMAGE, MES40 and MES80 from FoxPro to SQL
3. Upgrade PARAM and SELECT tables by running the above scripts and

Note: Running COMPAREDB (including update!) adds the report and its components to the system.

Setup Steps:

4. **Add the report to the menu** (and/or the TOOLMENU), using the following parameters
Menu name = Total Hours Report for Payroll Comparison
Program name = RTCSUM
Program type = Report

Note: The report has been added to TK's standard Menu (Under TC Daily Reports).

5. Parameter file settings

Group 1 – Section (Column descriptions):

Row 1 (Section 1) – Header (e.g. Paid Hours).

Row 2: (Section 2) – Header (e.g. Paid Premiums).

Row 3: (Section 3) – Header (e.g. Unpaid).

Group 2 – 4: Section Content

Specify the pay-categories for each section/column. The pay-categories are retrieved from TCDAY.

Group 5 - Total Descriptions

Row 1 (Section 1) – Totals Header (e.g. Total Hours).

Row 2: (Section 2) – Totals Header (e.g. Total Premiums).

Row 3: (Section 3) – Totals Header (e.g. Total Unpaid).

The Report can be modified via IMAGESP Generator. Modifications will commonly be used for expressions. For modifying the report, place you modifications in **Sub Totals 4** section.

Specifying the total description and the default pay categories is mandatory even if the entire report is re-designed via IMAGESP (commonly used for expressions).

6. Additional Options via the report's Select Screen
